NRE-19 SPECIFICATIONS

Mechanical Drawing

Rear View of Card Rack

- Power Connector is for +12V DC Power input. Ensure CHS (chassis) connection is properly grounded.
- Inter-rack sync connector has M/O connected to SI for normal single rack operations. If a second rack is intended to sync with primary rack then connect M/O and SI on primary rack to M/I and SI on secondary rack.
- When using a rack as a secondary then connect both pins on Rack Number connector together.
